Mathis.terrier11@gmail.com

Mathis TERRIER

LANGUAGES

ENGLISH: level B1

SPANISH: level A2

SOFTWARE SKILLS

Solidworks/Catia :

- Drafting
- Part design
- assembly modeling
- Machining drawing
- Geometric Tolerances
- Prototyping

Matlab - Automatisation

Google sheets - comptability

PORTFOLIO

EDUCATIONS

INSA Hauts-de-France / Valenciennes, France
Master's Degree in Mechanical &
Energy Engeneering (Expected 2029)

INSA Hauts-de-France / Valenciennes, France
Integrated Engineering Preparatory Program
(2024 - 2026)

- Science and Humanities for Engineers

INTERESTS

Motorsports Sports Traveling

Mathis TERRIER

MECHANICAL AND ENERGY ENGINEERING STUDENT
SEEKING A 4TH-YEAR INTERNSHIP

WORK EXPÉRIENCE

Agricultural Worker / Farm Hand | La Lavardoune
Summers 2023 - 2025 (1 month per year)

- Performed manual labor and gained hands-on experience in agricultural operations.
- Collaborated and communicated effectively within a operational team.
- Managed orders and customer deliveries.
- Adapted tasks dynamically based on daily operational constraints.
- Monitored and maintained agricultural machinery.

Automotive Mechanic Intern | Acqua Rossa MotorSport May 2021

- Learned fundamentals of automotive mechanics and hands-on maintenance.
- Repaired a fiberglass front splitter.
- Configured and tuned a car for track performance:
  - Chassis optimization: Suspension tuning and adjustments.
  - Weight balancing: Mass distribution to optimize the center of gravity.
  - Grip maximization: Wheel alignment adjustments (toe-in/toe-out and camber settings).

PROJECTS & EXTRACURRICULAR ACTIVITIES

Treasurer | Valenciennes Student Chaplaincy
2025-2026

- Managed annual budget and controlled accounts.
- Organized activities while operating under budget constraints.
- Handled internal communication with association members.

Active Member | Valmev (Student Engineering Association)
2024-Present

- Designed and built a prototype vehicle for the Shell Eco-marathon:
  - Developed electrical circuit and engine instrumentation.
  - Completed CAD design for transmission system and created machining drawings.
  - Manufactured a fiberglass and carbon fiber body shell.

Humanitarian Project & Pilgrimage | Togo (3 weeks)
Summer 2026

- Participated in a local charitable community project.
- Developed adaptability, open-mindedness, and cross-cultural understanding.
- Enhanced teamwork capabilities in an international environment.

Robotic Lawn Mower Design Project | Academic Engineering Project (70h)
jun 2026

- Developed a product from scratch, from establishing technical specifications to final implementation.
- Managed team organization, project execution, and task rigor.
- Enhanced software and programming skills.
- Solved design challenges creatively within defined engineering constraints.
